

ONCOLOGY EXPERIENCE AND EXPERTISE

Challenge

A phase III, randomized, international, placebo-controlled, multicenter clinical study in Squamous Cell Carcinoma of the Head and Neck with complex protocol and competitive recruitment.

Optimapharm Approach

- Selection of reliable sites and close collaboration with PIs.
- Choice of experienced and knowledgeable CRAs that provided support to motivate PIs to enroll and retain patients.
- Started the recruitment right after site activation.

Outcomes

Achieved 111% recruitment within agreed timelines.

FPI enrolled in the study 18 days after receipt of Regulatory Greenlight despite the complex site activation process.
