

CASE STUDY

ENHANCING DATA MANAGEMENT EFFICIENCY

by using **Functional Service
Provider (FSP)** model

OPTIMAPHARM

FSP

Background

A **global non-profit organization** was conducting multiple clinical trials across different therapeutic areas but faced **challenges in managing the growing data sets**. They lacked the expertise and infrastructure needed to handle complexity of the data, which included patient information, trial results and safety data.

Solution

The organization partnered with Optimapharm, leveraging their comprehensive data management services.

Optimapharm provided a **dedicated team of data management professionals** who implemented a robust data management system, streamlined data collection processes, and ensured real-time data monitoring.

Outcomes

Optimapharm's involvement allowed the organization to **streamline their data processes**. The clean and well-organized data enabled **accurate and timely analysis**, which was crucial for assessing the safety and efficacy of the investigational products. This collaboration led to the identification of key trends and patterns in the data, informing strategic decisions that **enhanced the overall success of their clinical trials**.

OPTIMAPHARM

As a result, the company was able to **accelerate its drug development timeline**, optimizing resource allocation.

Optimapharm is a **globally operating**,
leading, mid-sized, **full-service CRO**.
Our main focus is our people, consistent
quality delivery to our clients, and
supporting the development of new
therapies to improve and save
patients' lives.
